

Fire Safety Policy

In order to ensure the safety of all children in my care smoke alarms are checked monthly and will be recorded in the fire folder. The smoke alarms are located in the hallway and the upstairs landing.

Also to ensure safety, fire control equipment is stored in the kitchen, in the form of a fire blanket and a fire extinguisher.

The children will be made aware of what will happen in the unlikely event of a fire and a fire drill will be practised termly, this will be recorded in the fire folder.

Fire Evacuation Plan

In the unlikely event of a fire and emergency evacuation when I have children in my care, I will follow this procedure:

- Get the children out as quickly as possible. I will leave the house through the hallway and by the main front door, retreating to a safe distance.
- I will close all the doors as I leave the house.
- Once safely outside I will phone the fire brigade.
- I will then phone the children's parents/carers or emergency contacts if they are not available.
- Ofsted will be called to inform them of this incident.

I will always carry my mobile phone fully charged, the number of which has been issued to all parents. All emergency contacts for each child are stored on this phone.
